

CGM
ENGINEERING LTD.
CORPORATE PROFILE

About Us

CGM Engineering Ltd. is a Winnipeg-based company providing electrical and mechanical design and consulting engineering services in Manitoba, Saskatchewan, Alberta, and British Columbia. We believe success begins with communication and take great pride in providing our clients with efficient and cost effective designs.

Our team is ready to handle any project that comes our way. Our team has a diverse set of skills so we can deliver the best solution for any project.

No matter the size of project we're always excited by the challenges and rewards that come with each design we work on!

What We Do

Mechanical Design Services include heating, ventilation, air conditioning, and plumbing system design.

Electrical Design Services include lighting, power distribution, life safety systems, emergency generation, and specialty equipment design.

Our team encourages LEED® and similar energy-conscious building designs.

CGM Engineering Ltd. has vast experience with a wide variety of electrical and mechanical projects including:

- Commercial and Retail Buildings
- Health Care Facilities
- Educational Buildings
- Religious Buildings and Buildings of Worship
- Residential Buildings
- Government Buildings and Office Spaces
- Industrial Buildings
- Parking Structures and Storage Facilities
