

## Mechanical Designer (Winnipeg, Manitoba)

**Are you looking for a meaningful career and a chance to grow in your role as a technical specialist and a leader? Then consider joining the team at CGM Engineering Ltd. as a full time Mechanical Designer.**

CGM is a steadily-growing Winnipeg-based Mechanical and Electrical engineering consulting firm that has built a reputation of providing quality engineering services to a wide variety of clients across western Canada. CGM works on a diverse group of projects including offices, commercial spaces, multi-unit residential buildings, restaurants, and grocery stores. Our office is located in one of Winnipeg's most attractive and pleasant walkable neighbourhoods within close reach of many parks and restaurants. We value work-life balance and offer all employees flexible work hours, summer hours, and generous holidays.

**The position would include the following duties:**

- Design of H.V.A.C. and plumbing systems including heating, cooling and ventilation load calculations, equipment selection, drafting of engineering drawings, and production of written specifications
- Managing projects - coordination with design team, clients, owners and contractors, processing of project documents, and field inspections from project inception to completion

**Interested candidates must possess the following assets:**

- Excellent verbal and written communication skills in the English language
- Detail oriented and self-motivated with the ability to work effectively both independently and within design groups (engineers, architects, owners, contractors, etc.)
- Proven ability to multi-task efficiently and respond to changing priorities of a fast-paced office environment
- Superior time management and organizational skills with the ability to meet deadlines for multiple concurrent projects
- A team player willing to form and contribute to common goals that help themselves, their colleagues, and the company excel together
- A high level of accuracy and attention to detail
- Ability to travel within Canada as required

**The following technical qualifications are required:**

- Understanding of H.V.A.C. and plumbing systems and relevant codes
- Proficiency in the use of AutoCAD and Microsoft Word

**The following technical qualifications are considered an asset:**

- A Professional Engineering designation (PEng preferred) with at least three years of experience in H.V.A.C. and plumbing design
- Experience with Revit

Job Type: Full-time, permanent, Monday to Friday  
Benefits: Health spending account, RRSP matching  
Salary: Negotiable and dependent on experience and qualifications  
Work location: In-person

Interested candidates should email resumes and cover letter to [stephen\\_glockner@cgmeng.ca](mailto:stephen_glockner@cgmeng.ca). All applications will remain confidential and will not be shared or disclosed. Though we appreciate all applications, only applicants that currently reside in Manitoba will be considered and only those applicants selected for interviews will be contacted.

Job posting will remain open until position is filled.
